

有機物理化学研究室 ショートセミナー

Dr. Toru Kondo

(Massachusetts Institute of Technology, USA)

Protein dynamics regulating initial photosynthetic processes revealed by single molecule spectroscopy

日時: 2016年12月27日(火) 13:00 ~ 14:00

場所: 理学研究科 化学専攻 209号会議室(物理・化学合同棟2階)

Dr. Kondo has applied the single-molecule spectroscopy to some photosynthetic proteins to elucidate their photo-reactions, functions, and structural fluctuations. I asked him to give a short lecture in English during his stay in our laboratory. Please join the lecture.
